

WHAT IS HYPERBARIC OXYGEN THERAPY?

Hyperbaric Oxygen Therapy (HBOT) is the medical use of oxygen at a level higher than atmospheric pressure. It significantly increases the partial pressure of oxygen in the body tissues and promotes increased oxygen transport capacity of the blood. By increasing the amount of oxygen rich blood, HBOT stimulates the body to release substances that promote healing.

WHAT CAN BE TREATED WITH HBOT?

In treating inflammation, oxidative stress and cellular detoxification, HBOT promotes healing in many disorders:

- ADD/ADHD
- Autism
- Autoimmune Diseases
- Brain Injury
- Cerebral Palsy
- Chronic Fatigue Syndrome
- Chronic Inflammation
- Concussive Injuries
- Fibromyalgia
- Inflammatory Bowel Disease (IBD)
- Lyme Disease
- Migraines
- Multiple Sclerosis
- Post Chemotherapy Treatment
- Post Radiation Treatment
- Post Stroke
- Sports Injuries

Center for Integrative Health offers soft and hard chamber HBOT treatment options. Please contact the office at 203-834-2813 for more information.
